

Supplementary Table 1: History of Family Planning and Reproductive Status

Variable	Category	n	%
Contraceptive users	Not married/No users	304	72.0
Contraceptive users	Users	118	28.0
Contraceptive methods*	Hormonal methods	54	45.8
Contraceptive methods*	IUD	27	22.9
Contraceptive methods*	Barrier methods	12	10.2
Contraceptive methods*	Natural methods	25	21.1
Number of marriages†	Once	221	94.9
Number of marriages†	Two times and more	12	5.1
Number of husband's marriages†	Once	197	87.6
Number of husband's marriages†	Twice or more	28	12.4

Supplementary Table 2: Attitude Towards Cervical Cancer and HPV Vaccine

Variable	Yes n (%)	No n (%)
Source: Internet	181 (42.9)	241 (57.1)
Source: Medical resources	115 (27.3)	307 (72.7)
Source: Friends/Family	149 (35.3)	273 (64.7)
Took HPV vaccine	12 (2.8)	410 (97.2)
Had Pap smear screening	171 (40.5)	251 (59.5)
Would accept vaccine if available	238 (56.4)	184 (43.6)
Would recommend vaccine	274 (64.9)	148 (35.1)
Support national immunization program	292 (69.2)	130 (30.8)
Attitude overall: Insufficient	282 (66.8)	
Attitude overall: Sufficient	140 (33.2)	

Supplementary Table 3: Preferred Age for HPV Vaccination Among Participants

Category	n	%
9-13 years	13	3.1
14-26 years	172	40.8
≥ 26 years	80	19.0
I did not know	157	37.2
